

Welcome to OsmoDevCon 2018

Harald Welte <laforge@gnumonks.org>

Welcome

- 2018 marks the 7th incarnation of OsmoDevCon
- Great to see all of you (again)
- Great to see some new faces, too!

OsmoDevCon

- by developers for developers
- as technical as it gets
- at least as much about the people involved than the topics
- feel free to present things beyond classic Osmocom
- any reasonably advanced technical topic is welcome
- ... as far as time permits

Venue

- Three rooms that we can use
 - main room
 - the *rear room* (this year with table)
 - the *PC room* in the back
- two washrooms/toilets
 - use load-balancing algorithm
- basement kitchen
 - we'll put up foot catering there

Beverages / Coffee / Tea

Help yourself with:

- our own [filter] coffee + milk to use with the existing machine
- tea making facilities
- variety of beverages in the fridge
 - please keep a tally of how many bottles you consume
 - make sure to settle the total amount before you leave!
- snacks (sweets) available on top of fridge
 - same rules as for beverages
- cookies spread out on the meeting table(s)

Internet Access

- WiFi login / password marked on inner side of door
- Ethernet switches available around venue, just plug in + DHCP
 - don't cause Ethernet loops (no STP!)

Important Rules

- **DO NOT USE THE TAP (water) OR DISHWASHER IN THE BASEMENT**
 - you will cause a flooding if you do it anyway
 - instead, use dishwasher in the bathroom at the far back of the venue
- be excellent to each other

Changes from 2017

criticism from last year:

- need more time for hacking / chat
- one day less was not such a good idea (so back to 4 days)
- let's try to make use of the *rear room* for hacking
- we have pretalx and a real schedule!
- we have video recordings

Sponsoring / Thanks

- Lunch sponsored by sysmocom
- Dinner sponsored by sysmocom
- venue + internet provided by IN-Berlin e.V.
- video recording by c3voc
- presentations by our amazing Osmocom community
- guest presentations by
 - Sukchan Lee (nextepc)
 - B. Jovanovic and D. Webster (LimeSDR adaptive digital predistortion)
- 10x LimeSDR mini donated by Lime Microsystems
